One New Stock Added to S-Network Emerging Infrastructure Builders Index in Quarterly Rebalancing

New York, NY, June 11, 2010 -- The [S-Network Emerging Infrastructure Builders IndexSM](http://www.snetinfrastructureindex.com) (TICKER: EIBI) will add one new constituent in its quarterly rebalancing, effective 6:00 PM (EST) Sunday, June 20, 2010, changing the number of index constituents to 75.

The addition to EIBI is:

MMX Mineracao e Metalicos SA (TICKER: MMXM3 BZ)

A complete list of constituents and weights will be posted on the S-Network Emerging Infrastructure Builders IndexSM website (http://infra.snetglobalindexes.com/about_the_indexes.php) as of the effective date.

The S-Network Emerging Infrastructure Builders IndexSM is a capitalization-weighted, float-adjusted index of the most prominent infrastructure stocks from developing and middle-income countries, plus a limited number of developed market stocks with extensive emerging markets operations. To be included in the EIBI index, stocks must pass multiple screens, including for capitalization, float, exchange listing, share price and turnover.

Detailed information, including constituent data, rules and price information on the S-Network Emerging Infrastructure Builders IndexSM is available at www.snetinfrastructureindex.com. Data is also available through most vendors of financial data.
