Three Stocks Deleted From S-Network Emerging Infrastructure Builders Index in Quarterly Rebalancing

New York, NY, December 6, 2011 -- The [S-Network Emerging Infrastructure Builders IndexSM](http://www.snetinfrastructureindex.com) (TICKER: EIBI) will delete three constituents in its quarterly rebalancing, effective 6:00 PM (EST) Sunday, December 18, 2011, changing the number of index components to 86.

The deletions from EIBI are: Group Five Ltd (TICKER: GRF SJ); Raubex Group Ltd (TICKER: RBX SJ); and Polimex-Mostostal SA (TICKER: PXM PW).

A complete list of constituents and weights will be posted on the S-Network Emerging Infrastructure Builders IndexSM website (http://infra.snetglobalindexes.com/about_the_indexes.php) as of the effective date. A large number of companies were added to the index due to a variety of factors, including new listings and increases in overall market cap. All additions are emerging market stocks, which enabled the index to drop certain developed market stocks which were used to maintain sector exposure.

The S-Network Emerging Infrastructure Builders IndexSM is a capitalization-weighted, float-adjusted index of the most prominent infrastructure stocks from developing and middle-income countries, plus a limited number of developed market stocks with extensive emerging markets operations. To be included in the EIBI index, stocks must pass multiple screens, including for capitalization, float, exchange listing, share price and turnover.

Detailed information, including constituent data, rules and price information on the S-Network Emerging Infrastructure Builders IndexSM is available at www.snetinfrastructureindex.com. Data is also available through most vendors of financial data.
